Customer Reviews

Far from being the "Ultimate" anything besides a loosely-FYI on something to do in your spare time. There is no How-to, Where-to, or What-to, as the author is probably keeping all the juicy details to himself to avoid competition. While this is understandable to some extent, after reading this short pamphlet, I feel that I know little more now than I did before. Misleading title, and empty in meaty content, it can be assumed that this ebook was written from regurgitated material. I'd avoid buying this booklet, especially at its price, as it is questionable that the author even knows how to actually do drop-shipping himself.

I already read few books about dropshipping as I decided to try this kind of business. But before engaging, I want to make sure that I am well-informed enough. I need a lot of basis and this book is one of it. Well researched by the author. Thanks for the information in here. I can guarantee that I am already in preparation stage in my career in dropshipping.

Dropshipping is one of the best business in todayâ™s time with which you can earn lot of money with minimum investment. This book guide you to start the dropshipping business easily. The techniques mentioned in this book are easy to implement and effective.

I used to dropship and found this book to be accurate and easy to understand. Thankfully the author stressed a couple of important points that are often overlooked in a book of this sort. 1. This is NOT a great rich quick plan and 2. It does NOT run on autopilot. It takes times to build up to a decent steady income and it requires regular effort.

The author of this guide copied nearly word for word from the Ultimate Guide to Dropshipping guide Shopify gives out for free. They actually removed most of the valuable information the FREE guide gives. Do not waste your money on this plagiarism.
