## Customer Reviews

As a Chinese mom, I buy lots of workbooks for my children. These include Kumon, Singapore, and quite a few others. I am not trying to recommend a specific book company (most of them are decent), but rather to un-recommend the Sprectrum workbooks (I bought 3 of them, all for 6 grade math).1. Books are thin on content - pages are sparsely populated2. Questions are too easy3. Answers have mistake, and the font is often too small to read without a magnifying glassAvoid at

any price

My daughter stated she enjoys the hints on each page. She said she feels encouraged to really work on the problems; however feels comforted that the hints are there if she needs them.

Very good to work in summer before the kids start their 6 th grade.
