The Global Oil Market: Risks And Uncertainties

Synopsis

The goal of this study is to provide a risk assessment of the global oil market. Cordesman and Al-Rodhan study six major oil-producing regions of the world: the Middle East, Africa, Asia and the Pacific, Europe and Eurasia, North America, and South and Central America. In each case, the authors outline national oil developments and focus on four major areas of risks and uncertainties: macroeconomic fluctuations, geopolitical risks, oil production uncertainties, and the nature of resources.

Book Information

Paperback: 168 pages

Customer Reviews

To be called a terrible book, this "work" would have to improve a great deal. This "work" simply does not fit into a book format; it is a gross compilation of other people's studies, and in its case, the EIA's work (and not even the latest), which is updated every year. It doesn't bring anything new. The author just proves that he is able to read and copy the EIA's work, which you can get for free on the web. The title is totally misleading. Do not waste your time reading it; or your money buying it. There are good books about the oil market on the market. If you want to understand it, read Mabro, Odell, Adelman; then, if you want to know how creative people can be in trying to forecast the future of the oil market, go to the EIA, IEA, or even OPEC, for their latest studies; you do not need a compilation of an out-of-date EIA study, in the wrong format, and to pay for it.

required reading as background history of oil to understand the future we need to understand the

past to the best of our abilities
